

## Diverse Learning:

A multitude of teaching methods will be used to accommodate all types of students. Everyone learns differently. Adaptions and modifications will be made to reach various learning styles, disabilities and English language learners.

## Parental/Guardian Involvement:

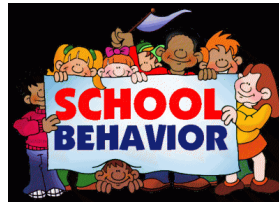

Researchers have evidence of positive effects for students when parents or guardians are involved in their education. You are encouraged to participate and become active in our classroom environment. Weekly newsletters will be provided to keep you informed.

## Classroom Management:

Classroom management involves well-written procedures to ensure a positive, effective, and safe learning environment for everyone. If students know what is expected and follow these guidelines, there will be little need for discipline.

## Rules and Discipline:

Rules and discipline will be addressed on the first day of school. Teacher and students will define classroom rules together. We will discuss the reasoning of each. If rules are broken, we will refer to the established list and discuss its importance again. If behavior continues, appropriate consequences will follow.

## Cooperative Learning:

Student will benefit from this learning style. A few benefits include:

- developing social and team building skills
- gaining higher achievement and self-esteem
- providing hands-on tasks and active movement

## Technology:

Ever-changing technology is here, making today's world available at our fingertips. We will take advantage of technology to broaden learning opportunities and gain effective knowledge. It will be used as an educational enhancement for students.
